

User Guide

Everything you need to run a great session, start to finish.

VERSION 1.0

AUGUST 2026

CAMBREE.AI

1. Before you start

Two things to have ready. That's it.

- **Your company's website address.** Cambree reads it to learn what you sell. Example: `acme . com`
- **A company you want to sell to.** A name or a website is fine.

What a "run" is. One run = one company researched. You'll see your count in the bottom-left corner of every screen, like `RUNS 2/25` . Starting a Quick Brief uses one run. Starting a Full Sales Session uses one run.

2. Choosing what to do

When you sign in you'll see two boxes. Pick one.

IF YOU WANT TO...	CHOOSE	WHAT HAPPENS
Learn about one company, fast	Quick Brief Left box	Type the company name, click <code>Go →</code> . You get research on that company: executives, strategy, financials, competitors. No setup needed.
Prepare to actually sell to someone	Full Sales Session Right box	Click <code>Start Full Session →</code> . Cambree learns your business first, then builds a complete plan for the call. Nine steps, about 10 minutes.

Not sure? Use the Full Sales Session. It costs the same one run and gives you far more: the research *plus* what to say, what to ask, and how to handle objections.

3. Setting up your company

You only do this once. Cambree remembers it for every future session.

- 1 Click `Start Full Session →` in the right-hand box.
- 2 A field appears labeled `SELLER URL` . Type your company's website and nothing else. No `https://` needed.
- 3 **Optional but worth 30 seconds:** click `Add more details` . Pick your funding stage, your market segment (SMB, Mid-Market, or Enterprise), and describe your ideal customer in one sentence. This makes everything downstream sharper.

- 4 Click **Analyze my company →**. Cambree reads your website. This takes about 30 seconds.
- 5 **You may see a box that says "Let's add a little context."** That means your website didn't say much about what you sell. Click **Upload materials** to add a case study or one-pager, or **Describe what you sell** to type it out. Either works.
- 6 Click **Start my session →**.

If you skip the seller URL, Cambree can still research companies, but it won't know what you sell — so no pitch, no angle, no solution mapping. That's the difference between a report and a plan.

4. The nine steps, and what to do on each

The bar across the top shows where you are. Click **Next →** to advance, **← Back** to return. Nothing is lost when you go back.

#	SCREEN	WHAT YOU DO	WHAT YOU GET
1	Start	Enter your website, click Analyze my company , then Start my session .	Cambree now knows your business.
2	Who to Sell To	Review your ideal customer profile. Correct anything wrong — click the X on any bullet that doesn't fit. Paste your team's own ICP in the top box if you have one.	Your ICP, your differentiators, and the competitors you're up against.
3	Add Companies	Three ways: Upload CSV (any CRM export), Quick Entry (type names), or fill in the target-list builder (industries, headcount, revenue, ownership) and let Cambree find them.	Your prospect list, ready to score.
4	Best-Fit Ranking	Read the scores. Each company is rated on three dimensions with the reasoning shown.	A ranked list so you call the right accounts first.
5	Pick a Company	Choose one account and select what you want from the call.	Cambree focuses everything on that deal.
6	Brief	Read it. Click the sources — every claim links to where it came from.	Executives, strategy, financials, competitors, recent signals.
7	Game Plan	This is the most important screen. Read it before your call.	Your hypothesis, discovery questions, objection handling, who to talk to.
8	On the Call	Keep it open during the conversation. Ask Milton anything.	Live coaching while you're talking.
9	After the Call	Note what happened.	A debrief, a follow-up email, and a CRM note — written for you.

5. Connecting HubSpot

Optional. Takes about a minute. Lets you push briefs and notes straight into your CRM.

- 1 Click the  button in the top-right corner of any screen.
- 2 Choose **[Your Company] Settings** from the menu.
- 3 Scroll to the section headed **CRM INTEGRATION**.
- 4 Click the connect button and sign in to HubSpot when the window opens. Approve the permissions.
- 5 You'll see **"Connected to HubSpot"** with your account number. Done.

Once connected, briefs and post-call screens will offer to push companies, contacts, deals, and notes into HubSpot. To disconnect, return to the same screen and click **Disconnect**.

6. What you actually get

The Brief (step 6)

- Company snapshot: revenue, headcount, ownership, HQ
- Key executives and what they're responsible for
- Board and investors
- Financial detail
- Competitors and current vendors
- Recent news, hiring, and growth signals
- A source link on every factual claim

The Game Plan (step 7)

- Your hypothesis: why they'd buy, and why now
- Discovery questions written for this account
- The objections you'll hear, with responses
- Who to talk to and in what order
- How your products map to their problems
- Draft outreach you can edit and send

7. Tips that make a real difference

DO THIS	WHY
Correct your ICP on step 2	Click the X on anything wrong. Two minutes of editing makes every score and every brief afterward more accurate.
Name customers you've already won	It turns generic scoring into "this account looks like one you closed."
Open the sources	Being able to say "according to their Q3 filing" is the whole point. Have one open during the call.
Use Ask Milton	The chat bubble in the bottom-right knows your session. Ask it to sharpen a question or handle a specific objection.
Click Save	The  Save button at the top keeps your session. Find it again under  Sessions .
Add your documents	 + Add Docs in the session bar lets you upload case studies or one-pagers. Cambree writes better plans when it knows your proof.
Refer a colleague	Settings has a referral link. When someone signs up and runs their first brief, you get a bonus run — up to 5 a month.

8. If something isn't right

WHAT YOU'RE SEEING	WHAT TO DO
The brief looks thin or missed something	Rebuild it. Use the retry option on the brief screen — you won't be charged another run for a retry.
"Let's add a little context" appeared	Normal. Your website didn't describe your products in enough depth. Upload a case study or type a description.
The ICP doesn't sound like your business	Edit it on step 2, then click  Regenerate . Or paste your own ICP in the "Your Internal ICP" box.
Fit scores look wrong	Usually the ICP. Fix step 2 first, then re-rank.
You've run out of runs	An upgrade window will appear. Plans and pricing are under  → Plans & Pricing.
Anything else	Email info@cambree.ai , or click  Guide or  FAQ at the top of any screen.

One habit worth forming. Most people stop reading at step 6 because the research looks impressive. The value is in step 7. Open the Game Plan, read the five discovery questions, and take them into the call. That's the difference between knowing about a company and being ready to sell to it.
